DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-24, drawn to a system and apparatus for using a detachable device to remotely control a computer, classified in class 710, subclass 5.
- II. Claims 25-29, drawn to a method for detecting removal of a peripheral device, classified in class 710, subclass 19.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another and materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case The process of claim 25 can be practiced a computer that detects when wireless network adapter is removed and the user is notified via a GUI that the computer is now offline.

Art Unit: 2182

3. Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.
